

wShares Enhanced Gold ETF

A New Way to Invest in Gold™

Fund Description

The wShares Enhanced Gold ETF (the “Fund” or “WGLD”) seeks to closely reflect the performance of the wShares Gold Index (the “Index”) less the Fund’s liabilities and expenses. WGLD rebalances physical gold and cash utilizing a rules-based methodology that automatically adapts to market conditions within the gold and US equity markets (the “S&P 500®”). The Index’s purpose is to seek to outperform a stand-alone investment in gold and reduce its risk profile without the use of any futures, leverage or derivatives.

Index Overview

The objective of the Index is to seek to reduce the risk-profile typically associated with the purchase of gold, as measured by the realized volatility of the LBMA Gold Price, while also generally increasing its exposure to gold during periods of heightened realized volatility in the S&P 500® as gold may serve or act as a diversifier and a hedge within a portfolio of assets, especially during times of heightened realized volatility in the S&P 500®. The Index utilizes a passive, rules-based methodology that rebalance monthly.

WGLD FUND DETAILS	
Inception	2/18/2021
Ticker	WGLD
Exchange	NYSE Arca
Fund Type	ETF
Investment Style	Passive
Creation Basket	10,000

WGLD is intended to serve as a piece of an overall portfolio allocation.

Table I. Performance of the S&P 500® Versus Gold (US\$/oz) Over Various Periods of Time

Period	S&P 500®	Gold
20 year	9.5%	9.3%
10 year	16.6%	0.7%
5 year	16.9%	5.5%
2 year	22.3%	7.9%
1 year	30.0%	-8.3%
Dot.com Bubble*	-22.3%	4.6%
Financial Crisis*	-43.3%	17.4%
Covid-19 Crash*	-33.7%	-3.5%
First Decade of 2000s*	-0.8%	14.1%

Chart I. S&P 500® (Total Return) and Gold Performance in Market Downtrends

Source: S&P Dow Jones and LBMA as of September 30, 2021. Since the Index seeks to reduce the risk-profile typically associated with the purchase of gold while maintaining the correlative benefits of gold versus the equity markets, neither the Index nor the Fund is designed to precisely correlate with the actual performance of gold. The S&P 500 is an equity index representing the performance of the broad U.S. stock market, while the Gold time series represents the performance of an investment in physical gold. The time periods in the chart correspond to the period 9/30/2001-9/30/2021 (20-year), 9/30/2011-9/30/2021 (10-year), 9/30/2016-9/30/2021 (5-year), 9/30/2019-9/30/2021 (2-year), 9/30/2020-9/30/2021 (1-year). Dot.Com Bubble returns were measured between 03/24/2000-10/09/2002. Financial Crisis returns were measured between 10/09/2007-03/09/2009. Covid-19 Crash returns were measured between 02/17/2020-03/23/2020. First Decade of 2000s data dates between 12/31/1999-12/31/2009. Returns greater than one year are annualized except for the scenarios indicated by a * where they are from point to point.

wShares Enhanced Gold ETF

Why Invest in WGLD

Seeks Strong Risk-Adjusted Returns – WGLD’s Index’s purpose is to seek to outperform a stand-alone investment in gold while simultaneously seeking to reduce its risk profile by lowering volatility.

Removing Emotion – The Fund may assist investors to overcome the often negative consequences of emotional trading, especially during heightened volatility. WGLD’s Index utilizes Adaptive Exposure™, a methodology that rebalances its exposure to gold based on changing market conditions.

Innovative – Staying on the cutting edge of financial innovation. Wilshire Phoenix’s wShares was named as a Listmaker at the 2020 Benzinga Global Fintech Awards in advance of the launch of WGLD. Additionally, the wShares Gold Index was nominated for Best New Index at the ETF.com Awards 2020.

Efficient – The Fund provides easy access to a methodology in a transparent, passive and rules-based manner that sets aside the use of futures or any form of leverage to achieve its investment objective.

Table II. S&P 500® Volatility Versus Gold (US\$/oz) Over Various Periods of Time

Period	S&P 500®	Gold
20 year	19.2%	17.2%
10 year	16.6%	15.4%
5 year	18.9%	13.6%
2 year	25.6%	16.9%
1 year	13.7%	15.1%
Dot.com Bubble	22.6%	13.1%
Financial Crisis	37.5%	29.2%
Covid-19 Crash	75.4%	31.7%
First Decade of 2000s	22.0%	18.5%

wShares Enhanced Gold ETF

Important Disclosures

This material must be preceded or accompanied by a prospectus. Please read the prospectus <https://bit.ly/wSharesWGLD> carefully before investing.

The shares of the Fund (the "Shares") may trade at, above (a premium), or below (a discount) the net asset value ("NAV") per Share and are not individually redeemed from the Fund. The NAV per Share will fluctuate with changes in the market value of the physical gold ("Physical Gold") owned by the Fund. The price of gold is volatile and historical fluctuations in gold prices are not a reliable indicator of future gold price movements. Since the Index seeks to reduce the risk-profile typically associated with the purchase of gold while maintaining the correlative benefits of gold versus the equity markets, neither the Index nor the Trust is designed to precisely correlate with the actual performance of gold. Therefore, an investor in Shares may not be able to achieve a return that precisely correlates with the return an investor may achieve by investing directly in gold.

There is no guarantee that the high trading price of gold will be sustained. The Share price reported under "WGLD" is not the same as the intraday indicative NAV ("INAV"); the INAV may vary significantly from the Share price, particularly during times of volatility of gold prices.

The Index level calculated and published by approximately 7:00 p.m. (New York City time) under "WGIX" is not the same as the intraday indicative value for the Index ("IIV"); the IIV may vary significantly from the Index level, particularly during times of volatility in gold prices.

An investment in the Shares may be adversely affected by competition from other methods of investing in commodities, and the availability of other gold products.

The Fund may terminate and liquidate at a time that is disadvantageous to Shareholders. The Share price will fluctuate with changes in NAV per Share as well as market supply and demand. The amount of discount or premium in the Share price relative to NAV per Share may be affected by non-concurrent trading hours between NYSE Arca, Inc. (the "Exchange") and major gold markets. While the Shares will trade on the Exchange until 4:00 pm (New York City time), liquidity in the market for Physical Gold may be reduced after the close of major world gold markets including London and other locations. Depending on the price at which an investor purchased its Shares and whether the Shares trade at a discount or a premium to NAV may affect the investor's gain or loss on its investment in the Fund when Shares are sold. Investment return and principal value of an investment will fluctuate so that an investor's Shares, when sold or redeemed, may be worth more or less than the original cost. Purchases or sales of Shares may be subject to brokerage commissions, which will reduce returns.

Fluctuations in the price of Physical Gold could materially and adversely affect an investment in the Shares because the value of the Shares relates directly to the value of the Physical Gold held by the Fund. There can be no assurance that the Fund will achieve its investment objective. An investment in the Fund carries with it the inherent risks associated with investments related to Physical Gold. There can be no assurance that the Fund will achieve profits or avoid losses, significant or otherwise. The performance of the Fund may not track the Index during particular periods or over the long term. Disruptions in the ability to create or redeem creation units may adversely affect investors. Certain potential conflicts of interest exist between the Sponsor, its affiliates and the Fund's shareholders. Shareholders will be subject to taxation on their allocable share of the Fund's taxable income, whether or not they receive cash distributions. Shareholders will receive partner information tax returns on Schedule K-1, which could increase the complexity of tax returns.

While the Sponsor developed the methodology of the Index, the Index Calculation Agent is responsible for the day-to-day implementation of the Index methodology and calculation of the Index. The ability of the Fund to exercise remedies against the Index Calculation Agent may be limited.

Forside Fund Services, LLC is the marketing agent of the Fund.

The Fund is not an investment company regulated under the Investment Company Act of 1940, nor is it a commodity pool as defined in the Commodity Exchange Act, and thus is not afforded the regulatory protections applicable to such entities.

Index Disclaimers

The Fund is not sponsored, promoted, sold or supported in any other manner by the Index Calculation Agent nor does the Index Calculation Agent offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trademark or the current level of the Index at any time or in any other respect.
